Work From Home Readiness Assessment Services

Bizco is committed to helping our customers and future customers prepare for unexpected circumstances that could shut down business. Below are some of the questions you should consider.

Employee Needs:

- Home internet connection
- PC or laptop with active (preferably corporate) AV software
- Ability to complete calls from home
- Printing capabilities

Company Needs:

- Are there specific employees to designate for working from home?
- Do you have corporate laptops to distribute to all essential work from home personnel or do you intend for employees to use their own computers?
- Do you have a firewall with VPN? Do you have enough licenses to support the number of employees that may have to work remotely?
- Can your internet connection support an increase of VPN users to support all work remotely activity?
- Do you have a phone system that supports remote workers connected via Internet? Can it seamlessly distribute calls inbound and outbound from your remote workers?
- Are your critical applications supported over VPN or do you need another method of connectivity to your network?

These are just a few of the questions our team will review with you and then we will work with you on a customized Work From Home Plan to meet your teams needs.
